

MCC ADA Compliant Family Room

In May of 2010 the Town Council and subsequently the Department of Economic and Community Development approved the request to utilize housing rehabilitation revolving loan monies to fund the renovation of an existing family changing room into a second ADA compliant family changing room at the Mansfield Community Center. The bid was awarded to a Mansfield resident. The family changing room was shut down for work which began in the beginning of July and was completed and re-opened in the last week of July.

Extensive plumbing, electrical, carpentry and tile work needed to be done to complete this project in addition to the installation of a new ADA shower, lowering the sink, raising the toilette, all associated grab bars, accessible signage, and a handicap automatic push pad door opener, new locks and a new lighting system for the push pad to notify when occupied. We are happy to say that the waiting time for an accessible changing room has decreased dramatically!
